Formula for calculating your GPA from numerical marks:

Calculate your cumulative GPA (CGPA) as a percentage as follows:

\[
\text{CGPA} = \left( \frac{\sum_{\text{All courses}} \text{Marks obtained for course}}{\sum_{\text{All courses}} \text{Maximum possible marks for course}} \right) \times 100\%
\]

Note:
1) Ignore courses that have a letter grade or 'Pass' grade (e.g. Physical Education)
2) The CGPA needs to be expressed as a percentage (e.g. 82.8%)
