

# Manure Injection for Nutrient Management, Forage Production, and Profit

July 29, 2019 1pm to 3pm EST

Free Webinar

## Join to learn from the experts:

- **“Agronomic and Financial Benefits of Manure Injection and Integrated Small Grains into a Dairy Rotation”** with Dr. Heather Karsten and Dr. Virginia Ishler of Penn State. Integrating small grains and manure injection into a dairy rotation, such as spring soil moisture management, soil conservation, helping with manure nutrient management needs and weed control. (45 minutes)
- **“Manure injection and Nitrogen Management”** with Dr. Rory Maguire of Virginia Tech. This session will focus on research documenting changes in nitrogen fertilizer requirements associated with manure injection. (15 minutes)
- **“Custom Manure Applicator Perspectives on Manure Injection”** with Jeff Zimmerman (Agri-Applicators, Inc.) and Tim McMichael (McMichael Custom Spreading). Opportunities and challenges for expanding adoption of manure injection from applicator and client perspective. (30 minutes).

\*Note: There will be opportunities for questions after each topic

\*Proof of attendance will be provided for CEU opportunities
