

Learning to Listen

A SERIES OF FREE WEBINARS FOR PARENTS OF CHILDREN WITH HEARING LOSS

Join our team of specialists from the Learning to Talk Lab at the University of Maryland, College Park as we discuss tips to support your child's speech, hearing, and language development!

Ages 0-2: "After the hearing screening: Establishing a foundation for language growth following diagnosis"

- What can I do from when my child is **born to age 2** to support their language?
- How does speaking to babies support **brain growth** and later **language development**?
- What **types** of **language** can I use with my baby following diagnosis
- What kinds of **language skills** will my child develop immediately after intervention?
